BASCD Autumn Scientific Meeting

Navigating communication opportunities and threats

21st November 2019

Cavendish Conference Centre, London, W19 9DT
Introduction

The Autumn BASCD conference continues the 2019 theme of communication. In this one day meeting we will be looking at how we can navigate particular communication areas which we might consider to be challenging. Our three invited speakers will help us to understand the perspectives of those who we might feel present our most threatening communication challenges, consider how these may actually be opportunities, and give us insight into how to be proactive about seizing them.

The first of these challenges is working with the media and how to get the best from interactions with journalists in our roles as advocates for oral health. I don’t know about how everyone else feels but there is a certain amount of trepidation when I think about speaking to journalists and Mark Brealey, who runs a specialist media training company, will be there to help us understand what journalists are looking for.

The second area is the ever-changing world of threats associated with electronic communications through our mobile gadgets. We will be guided by a talented young professional hacker, Grant Douglas. For our third challenge, we will draw upon the career long expertise of Dr Gill Davies, MBE. Gill will encourage us to consider what oral health status information we have available at our fingertips and how to use it to communicate with other professionals and the public about the oral health of our populations.

Gail Douglas  
BASCD President

Aim:

To arm attendees with knowledge and skills to help guide them through particularly challenging areas of communication to enhance our roles as advocates for oral health protection and improvement.

Learning outcomes:

By the end of the conference participants will:

- To understand how best to proactively engage with journalists and harness the power of the press
- To understand the potential threats associated with mobile communications and how to protect ourselves from them
- To be aware of opportunities and threats in conveying key messages about oral health status

Programme - Thursday 21st November 2019
